

Avicta Complete Corn Now Available for Protection Against Nematodes, Insects and Diseases

Syngenta Seed Care introduces first corn seed treatment nematicide

Avicta® Complete Corn, which contains Avicta, the first seed treatment nematicide for use on corn, is now available to offer corn growers the only complete triple protection against nematodes, early-season insects and diseases. In addition to Avicta seed treatment nematicide, Avicta Complete Corn includes an increased rate of Cruiser® (0.50 mg ai/seed) seed treatment insecticide and Apron XL®, Maxim® XL and Dynasty® fungicides, together the most robust and widely used seed treatment fungicide package on the market. The components in Avicta Complete Corn work together to offer greater protection against the early-season threat of damaging pests to produce healthier plants and help each seed realize its full genetic yield potential.

“Corn nematode populations have increased due to changing production practices and are contributing to reduced yields in corn fields across the country,” said Mark Jirak, crop manager, Syngenta Seed Care. “With an average of only 40 total harvests in a lifetime, growers must start every crop off right, Syngenta Seed Care™ strives to keep growers on the cutting edge, so we are pleased to once again lead the seed treatment industry with this innovation to help corn growers succeed at producing more bushels per acre.”

Important: Always read and follow label instructions before buying or using Syngenta products.

Avicta® Duo Corn is a Restricted Use Pesticide. For use by certified applicators only. Growers planting Avicta Duo Corn treated seed are not required to be certified applicators.

Avicta® technology is protected by U.S. Patent No. 6875727, and other patents and pending patent applications in the U.S. and other countries.

Avicta Complete Corn is a promotional combination of separately registered products containing Avicta Duo Corn nematicide/insecticide and one or more of the following Cruiser insecticide, Apron XL, Maxim XL and/or Dynasty fungicide(s).

Cruiser Extreme 250 is a seed company-applied promotional combination of four active ingredients that delivers 0.25 mg ai/seed of Cruiser (thiamethoxam) plus three fungicides: Apron XL®, Maxim XL® and Dynasty.

Apron XL®, Avicta®, Cruiser®, Cruiser Extreme®, Dynasty®, Maxim®, Syngenta Seed Care™ and the Syngenta logo are trademarks of a Syngenta Group Company.
